

Instruction Guide to Add Someone to Your Close Friends List in Instagram

Close Friends List

Instagram is a social networking app for sharing media from a smartphone like Facebook and Twitter. Instagram is available for free on Android and iOS devices. Instagram is also accessible through web browser from a computer. However, uploading media and sharing existing media with other Instagram users is limited as compared to that of mobile app. The main intention behind the use of Instagram is to share and find the best photos and videos. If you share photos and videos, it will be visible to your friends and followers.

Instagram introduced a feature **Close Friends** in 2018. The main objective of this feature is to curate the list of friends/followers and select the list to share your Instagram stories. The **Close Friends** feature enables you to post Instagram stories for a specific group of friends/followers, which can be modified at any instant.

Add Close Friends

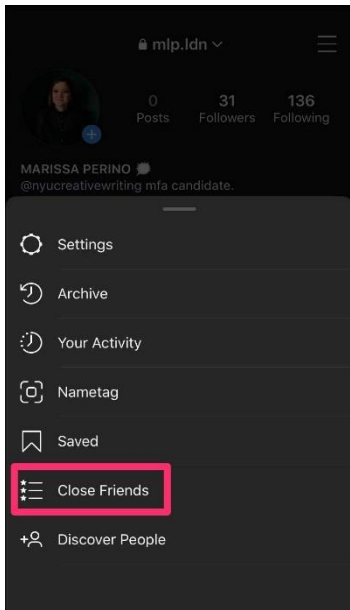

To add someone to close friends list in Instagram, follow the below steps:

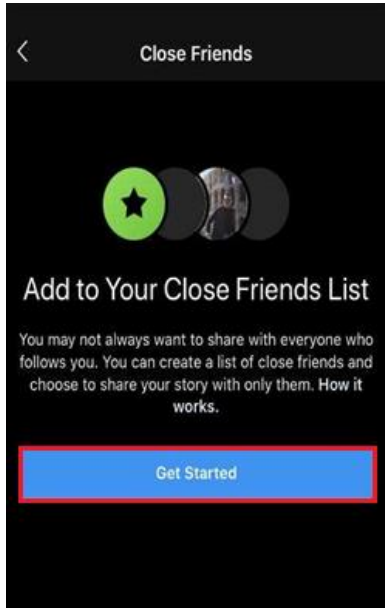

Procedural Steps	Screenshots
